

MARIJUANA FACTS

JOHNNY'S
AMBASSADORS

CANNABIS

is a genus with different plant species. These species contain hundreds of different chemicals called "cannabinoids."

THC

stands for delta-9-tetrahydrocannabinol and is the most common cannabinoid in the cannabis plant. It is psychoactive, meaning it affects your mind. This gives users a high feeling.

MARIJUANA

is a variety of cannabis that contains greater than .3% THC and is used to make drugs. THC comes from marijuana and is psychoactive.

HEMP

is a variety of cannabis that contains less than .3% THC and is used to make paint, rope, and paper.

CBD

stands for cannabidiol and is the second most common cannabinoid in the cannabis plant. It is not psychoactive by itself, but delta-8-THC can be created chemically from CBD and is psychoactive.

WHY ARE THE TERMS "CANNABIS" AND "MARIJUANA" NOT INTERCHANGEABLE?
