Johnny's Ambassadors THC Free America Tour is coming to your community to discuss the harms of youth THC use!

Potent Products:
Today's vapes, concentrates, edibles, and cannabis products are far more potent than the marijuana plant of 20 years ago.

Brain Development:
The impact of high-potency marijuana on the developing teenage brain is significant.

Mental Health:
There is a direct and dangerous link between use of today's high potency THC products and mental illness in youth.

Prevention:
Education is the most powerful tool for both parents and students to prevent negative life outcomes and tragedies.

As you know, lecturing and preaching doesn't work, so what does? Education. Laura Stack, the Founder of Johnny's Ambassadors, will give a one-hour presentation, followed by 30 minutes of Q&A and group discussion on what your community can do to prevent youth THC use.

Cost: $0 (donations to Johnny's Ambassadors gratefully accepted when you register)

For more information on your local event, please email Mirandaalt@yahoo.com. For more information, see THCFreeAmerica.com for a list of events.
